## Revised Syllabus of Courses of Bachelor of Management Studies

 (BMS) Programme at Semester II with Effect from the Academic Year 2016-2017Elective Courses (EC)

## 3.Business Mathematics

Modules at a Glance

| Sr. <br> No. | Modules | No. of <br> Lectures |  |  |
| :---: | :--- | :---: | :---: | :---: |
| 1 | Elementary Financial Mathematics | 15 |  |  |
| 2 | Matrices and Determinants | 15 |  |  |
| 3 | Derivatives and Applications of Derivatives | 15 |  |  |
| 4 | Numerical Analysis [Interpolation] | 15 |  |  |
|  | Total |  |  | 60 |

| Sr. No. | Modules / Units |
| :---: | :---: |
| 1 | Elementary Financial Mathematics |
|  | - Simple and Compound Interest: Interest compounded once a year, more than once a year, continuous, nominal and effective rate of interest <br> - Annuity-Present and future value-sinking funds <br> - Depreciation of Assets: Equated Monthly Installments (EMI)- using flat interest rate and reducing balance method. <br> - Functions:Algebraic functions and the functions used in business and economics, Break Even and Equilibrium point. <br> - Permutation and Combination: (Simple problems to be solved with the calculator only) |
| 2 | Matrices and Determinants |
|  | - Matrices: Some important definitions and some important results. Matrix operation (Addition, scalar multiplication , matrix multiplication, transpose of a matrix) <br> - Determinants of a matrix of order two or three: properties and results of Determinants <br> - Solving a system of linear equations using Cramer's rule <br> - Inverse of a Matrix (up to order three) using ad-joint of a matrix and matrix inversion method <br> - Case study: Input Output Analysis |
| 3 | Derivatives and Applications of Derivatives |
|  | - Introduction and Concept: Derivatives of constant function, logarithmic functions, polynomial and exponential function <br> - Rules of derivatives: addition, multiplication, quotient <br> - Second order derivatives <br> - Application of Derivatives: Maxima, Minima, Average Cost and Marginal Cost. Total revenue, Marginal revenue, Average revenue. Average and Marginal profit. Price elasticity of demand |
| 4 | Numerical Analysis [Interpolation] |
|  | - Introduction and concept: Finite differences - forward difference operator Newton's forward difference formula with simple examples <br> - Backward Difference Operator. Newton's backward interpolation formula with simple examples |
